TOXIC SUBSTANCES

April 30, 2008

Bradley F. Wilson
Vice President
PolyCon Systems, Inc.
350 Industrial Drive S
Madison, MS 39110

Dear Mr. Wilson:

The Environmental Protection Agency's Design for the Environment (DfE) Program congratulates you on the renewal of your DfE partnership and your valuable participation in our product recognition program.

Your partnership with EPA/DfE places you in a leadership group of product manufacturers in the surface coating sector. Sustainability-oriented companies like yours have committed to using the safest possible ingredients to make high-performing products. Your care and concern in selecting chemicals for your products is making an important contribution to our national effort to protect the environment and safeguard human health.

By renewing your DfE partnership, you have affirmed your commitment to seek and use safer chemistry in your products, to continually look for opportunities to further enhance their environmental, health, and performance characteristics, to provide measures of the ecological and commercial success of your products, and to similarly improve other products in your line.

Your commitment to safer chemistry and continuous improvement has set a fine example for your industry and DfE is proud to be your partner in these efforts.

DfE wishes you continued success with your recognized products and all your sustainability efforts. We look forward to building on this success during the next phase of our partnership.

Sincerely,

A handwritten signature in green ink that reads "Clive Davies".

Clive Davies, Chief
Design for the Environment
